WEBSITE STEPS

A simple guide to creating a website from planning to publishing.

PLANNING

Decide the purpose of your website and organize the content you want to include.

STRUCTURE

Create the basic layout using HTML to define pages and sections.

STYLING

Use CSS to design the look of the site and make it responsive for all devices.

FINAL TOUCHES

Test the website on different browsers and fix any bugs or layout issues.

PUBLISHING

Upload your website to a hosting server so it can be accessed online.
